

ENTERPRISE DATA ENGINEERING PLATFORM

DataNexus Platform

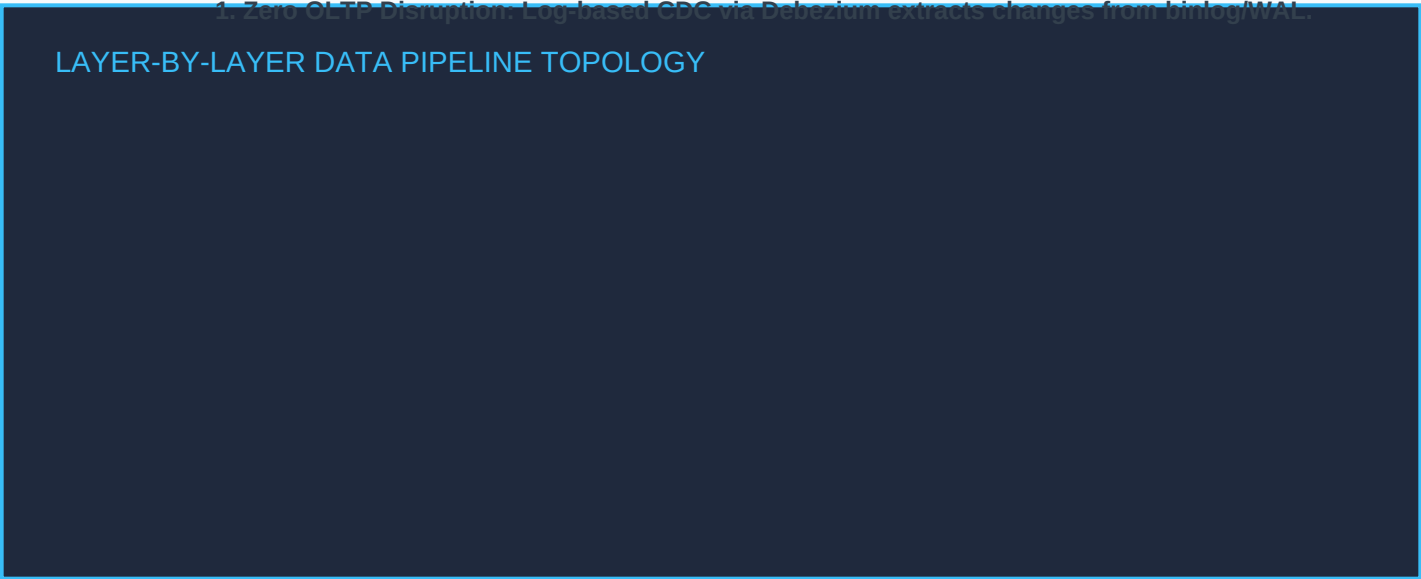

Primary Language: Python 3.11+ | Engine: Apache Spark 3.5.0

Real-Time E-Commerce Streaming, Medallion Lake & Analytics

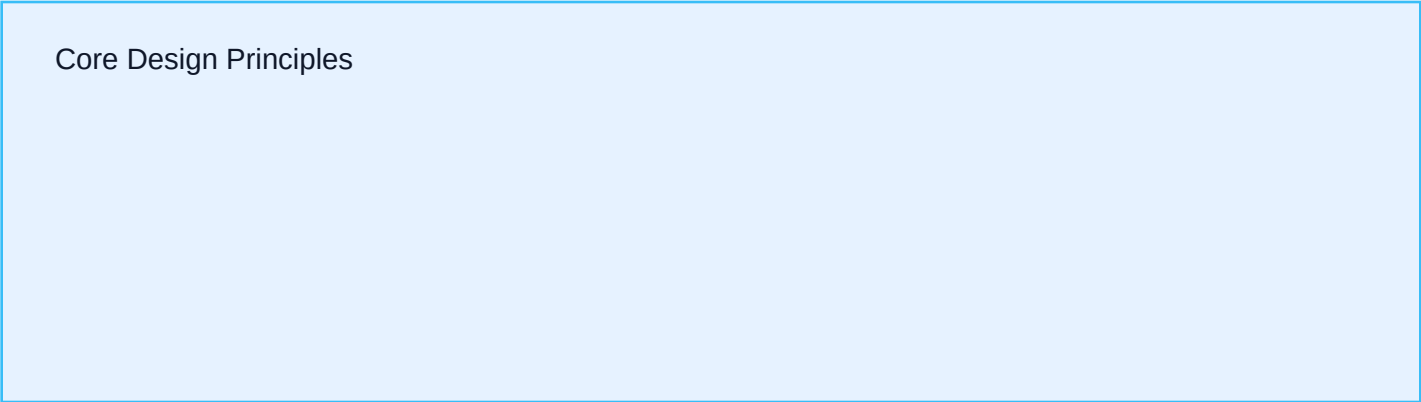

Key Architecture Highlights:

DEPLOYMENT & ENVIRONMENT SPECIFICATIONS

1. End-to-End System Architecture Overview

Architectural Problem Solved

2. Medallion Lake Architecture & Technology Matrix

Technology Stack Implementation Details

Layer
OLTP

3. Production Deployment & API Serving Guide

GET /api/v1/revenue/daily - Daily revenue breakdown across delivery cities

Execution Quickstart Runbook

complete containerization, multi-cloud Terraform templates, PySpark ETL pipelines,

The DataNexus project is 100% complete, fully implemented with working source code,

FastAPI Analytics Endpoints Available (Port 8000)

Project Completion Status
